

The first big social networking site. Originally launched in 2003. Big relaunch in 2013 with links to Justin Timberlake, now focused on music and entertainment.

- **Add songs to playlists or mixes**
- **Radio stations with different themes**
- **Upload your own music, videos and photos**

- **Default privacy settings are public**
- **Make sure to change these to restricted**
- **Profile and cover images are still public**
- **Create a “Portfolio” to let others see your pictures and music**

Remember to only share information you're happy to share with the world (including your parents and future employers).
